RAHEL BELACHEW

Computer Science & Engineering Graduate

+215-94050-8585 r.b.seraw@gmail.com Adiss Ababa, Ethiopia

PROFESSIONAL SUMMARY

Analytical and detail-oriented Computer Science and Engineering graduate with foundational knowledge of software systems, databases, and system design. Experienced in designing digital solutions, modeling business workflows, and developing interface prototypes for enterprise and web-based applications. A proactive learner with strong problem-solving and communication skills, eager to contribute to technology-driven teams, adapt to new responsibilities, and support the development of reliable digital solutions that improve business operations.

EDUCATION

Bachelor of Computer Science and Engineering **Sep 2019 - May 2024**

Adama Science and Technology University

- Cumulative GPA: **2.88**
- Relevant Coursework: Database Systems, Software Development, Data Communication and Computer Networks, Operating Systems, Web Programming.

PORTFOLIO PROJECTS

Temari-Bet – Educational Information Platform | UI/UX Design

Platform Design & Workflow Modeling

- Designed user workflows for a learning platform serving high school students and parents.
- Structured learning resources, including courses, study notes, video tutorials, and mock exams, with student rankings to encourage academic competition.
- Designed information flows for school announcements, events, and parent–school communication.

Load It — Bulk Logistics & Delivery Application

System Design & Process Modeling

- Mapped order placement, verification, dispatch, and delivery-tracking workflows for a bulk-delivery application.
- Designed process flows and interface concepts to support large-quantity commercial orders.
- Structured a dashboard displaying total products listed, orders in progress, and completed deliveries.

SHELF — Sales & Inventory Management Platform

Information Architecture & Workflow Design

- Designed user workflows for shop owners, staff, and salespeople to manage and monitor product inventory.
- Structured inventory interfaces to help users check product availability and track stock levels.
- Organized sales and order-recording workflows to support daily shop operations and inventory management.

TECHNICAL SKILLS & TOOLS

Programming & Web Technologies: HTML, CSS, JavaScript
Systems & Data: Systems Analysis, Database Fundamentals, Workflow Modeling
Digital Product Design: User Flows, Wireframing, Prototyping, Responsive Interface Design
Tools & Software: Figma, Visual Studio Code, Git, Microsoft Office
